QHSE CONSULTING

Vi Assurance assists organizations to develop, implement, maintain and improve management systems that are:

- Relevant to the organization.
- Easy to understand and effective in business compliance to legal and other requirements.
- Suitable to be used as a basis for training new staff.
- Value adding.

If required by you we will ensure that certification to the following standards (as applicable) is achieved:

- AS/NZS ISO 9001:2015 - Quality Management.
- AS/NZS ISO 14001:2015 - Environmental Management.
- AS/NZS 4801:2001 - Occupational Health and Safety Management.
- OHSAS 18001:2007 - Occupational Health and Safety Management.
- ISO 45000 - Occupational Health and Safety Management.
- ISO 27001:2013 Information Security Management.

These systems can be developed as stand-alone systems or as a single integrated management system.

It is through the methodology that we follow and the expertise of our people, that we are able to ensure that clients achieve real benefits and value from their management systems as well as certification to the applicable standards.

QHSE Support to organizations currently certified for various management system standards in maintaining the accreditation through the performance of the internal audits, facilitating the implementation of their existing procedures such as management reviews, operational control, hazard and risk management.

Standardization**

QHSE AUDITS

Quality Assurance Internal & External audits

Quality assurance audit is performed in order to ensure that the systems are in place and being followed religiously to provide good quality to the customers. It also highlights the need for any improvement in the systems in order to consistently deliver good quality products or services.

The audits are also performed to make sure that the organization is following the legal and regulatory requirements.

HSE Internal & External audits

A key component to continuous improvement in HSE is an effective audit and inspection program. Health, safety and environmental audits and inspections offer a strong return on investment when conducted by experienced and seasoned professionals.

Vi Assurance have a proven record of quality, integrity, and candor in our audits and assessments. Our audits provide our clients with the ability to identify and recommend improvements in their operations, projects and management programs.

We are thoroughly familiar with health, safety, and environmental regulations and know how they apply in real-world circumstances.

Following our audits and inspection, we have supported the development and implement of programs and procedures for our clients and the implementation of HSE management systems.

Contractor / Vendor Assurance Audits

Contract audits are a means by which contractor performance can be assessed prior to, during or upon completion of a contract. They are generally associated with major construction and ongoing maintenance contracts, although audits of other period and services contracts are becoming more common.

Accurate and timely contract audits can provide the client with information which will, for example, assist in:

- Short listing potential contractors.
- Ensuring a contractor is meeting its contractual obligations and requirements during the performance of a contract.
- Provide effective mitigations in the during the tenure of the contract to achieve contract performance.
- Identifying the circumstances which have led to a contractual noncompliance.
- Assessing whether a contract extension may be offered to a contractor in, for example, a period contract situation.

QHSE SECTORS

Vi Assurance has extensive experience in the following sectors.
